Languages, Frameworks, & Libraries
JavaScript (ES6), Ruby, Ruby on Rails, Node.js, React, jQuery, Express, EJS, HTML5, CSS, SASS, & Bootstrap

Databases & Other
PostgreSQL, MongoDB, Git, Adobe Photoshop, HubSpot, Excel, & Hootsuite

PROJECTS 💻

Untitled Card Game
Work in progress

Untitled Card Game is an application created with **HTML/CSS, JavaScript, React, Websockets, Node.js, Webpack, and PostgreSQL.** It is a platform that will host a variety of card games such as Blackjack. Players will be matched in real time and multiple card games can be played simultaneously across the platform.

League of Legends Match History
Dec. 2018

League of Legends Match History is a League of Legends utility application created with **HTML/CSS, JavaScript, React, Express, and Webpack.** It allows users to enter a summoner name and region and retrieve the summoner's most recent matches. This application utilized the Riot Games API and the League.JS library, and familiarized myself with working with APIs, rate limits, and navigating a complex data structure.

Exposure (LHL People's Choice Award Recipient)
Nov. 2018

Exposure is full-stack web application created with **HTML/CSS, JavaScript, React, Node.js, Express, PostgreSQL, and Webpack.** It helps connect freelance photographers with potential clients, and event planners with photographers. Exposure allows clients to search by keyword and navigate to the photographer's profile based on photos that fit their aesthetic. Photographers can upload to their portfolio and update their price packages and availabilities.

Choo-Choose
Sept. 2018

Choo-Choose is a full-stack polling web application created with **HTML/CSS/Sass, JavaScript, jQuery, EJS, Node.js, Express, Mailgun and PostgreSQL.** Taking care to optimize user experience, I helped implement features such as: designing and connecting the PostgreSQL database, adding and deleting additional input fields, dragging and dropping vote options, and a button to copy voting link to clipboard.

Other Projects
